Problem:
LoMaps does not show the ferry_termial in the region of the Bodensee. Switzerland_OAM shows it also wrong.
LoMaps has the problem at the online and the offline version. Cache is deleted.
All other tools do it correct.

I did some investigations: See below

Ferry Terminal Gaienhofen

LoMaps shows it at annother position. On the other side of the pier.
If on clicks on it LoMaps shows 384751708 deleted 6 moths ago from mcliquid.

Neu laden / Schließen / Hilfe

LoMaps shows it at the same position.
If on clicks on it LoMaps shows 984761845 deleted 3 moths ago from mcliquid.

There are some similars in this region: For example Wangen

Wangen Knoten 984751718 deleted from mcliqid. Text from mcliquid duplicate deleted.

My Feeling:
I think this three samples should be enough.
I think LoMaps and also Switzerland_Oam with Elevate Thema does it wrong: Why?????
I have checked approx 300 ferry_terminals in the last three month. I never found that problem.
From Bodensee to Gardasee.
Josm, IdEditor, ÖPNV, Dataset query shows it correct.

It seems that in all cases there is a deleted ferry_terminal nearby.
Mcliquid did it all correct.
If a deleted ferry_terminal is nearby, then I assume, that LoMaps does no more show the correct ferry_terminal.
